

Mike Casey - PDA Software Development - Project Unit part 1

P 1 Contributors Page

I was involved in the planning stage before leaving for my operation. I committed initial code via my team members' laptops. Below is output of the contributors page.

P 2 Project Brief

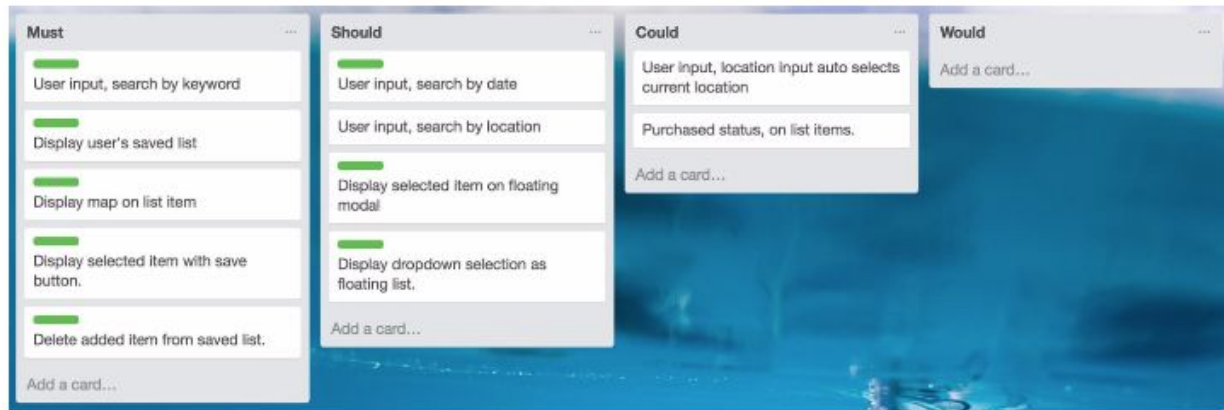

Gigs Dashboard

Music fans want to be able to view relevant music events on a dashboard. Use an existing API or create a new API to display details about events.

MVP

- Display upcoming events on a map
- Display relevant event information
- Allow users to add events to a favourites list

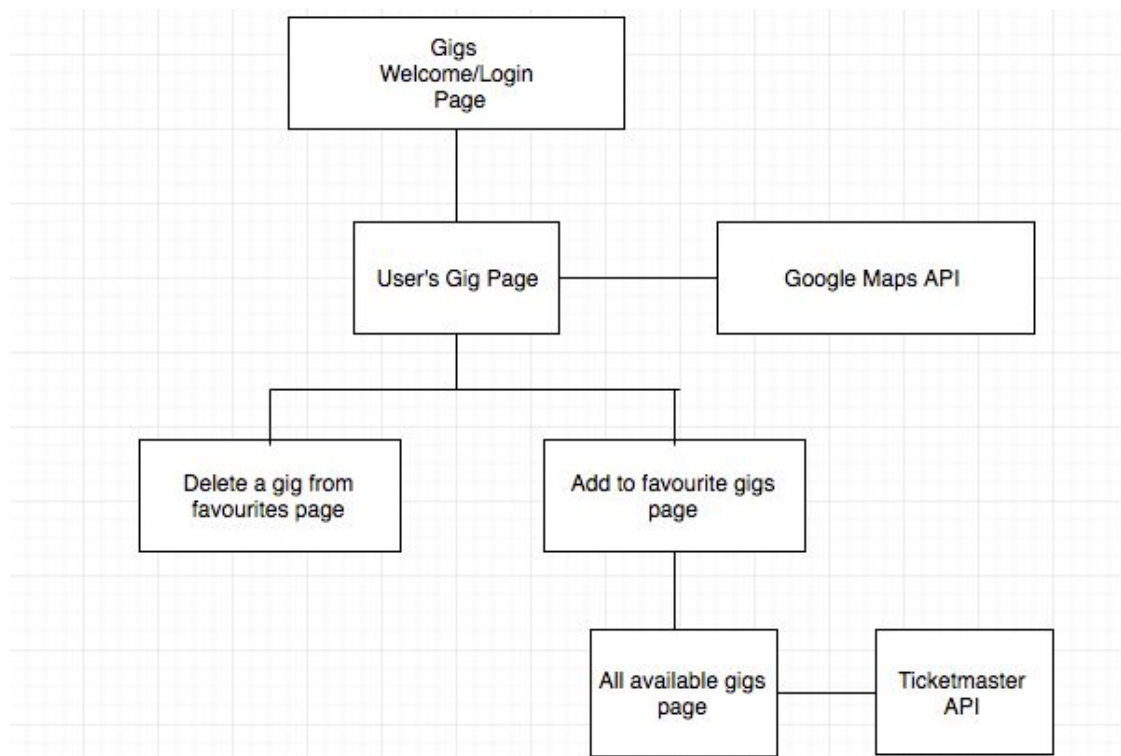

P 3 MoSCoW Board

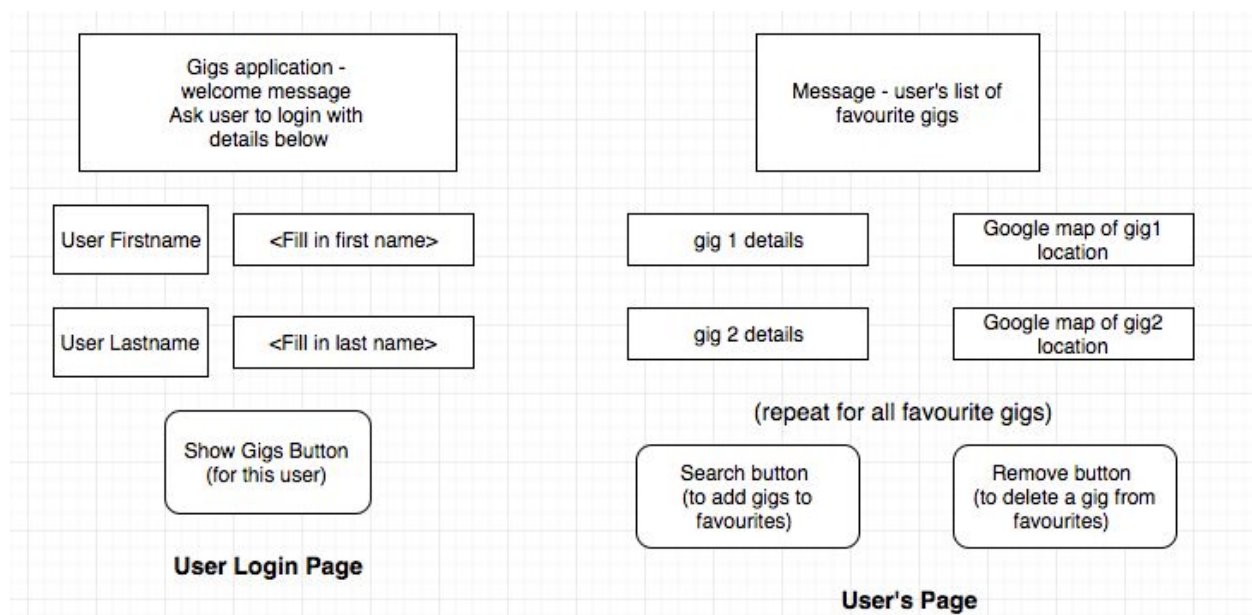

P 4 Acceptance Criteria

Acceptance Criteria
User is able to see previous favourite events
User can click on favourite event for more information
User can search using the TicketMaster API to search for events to add to favourites
User can view event location details on a google map
User can remove item from favourites list

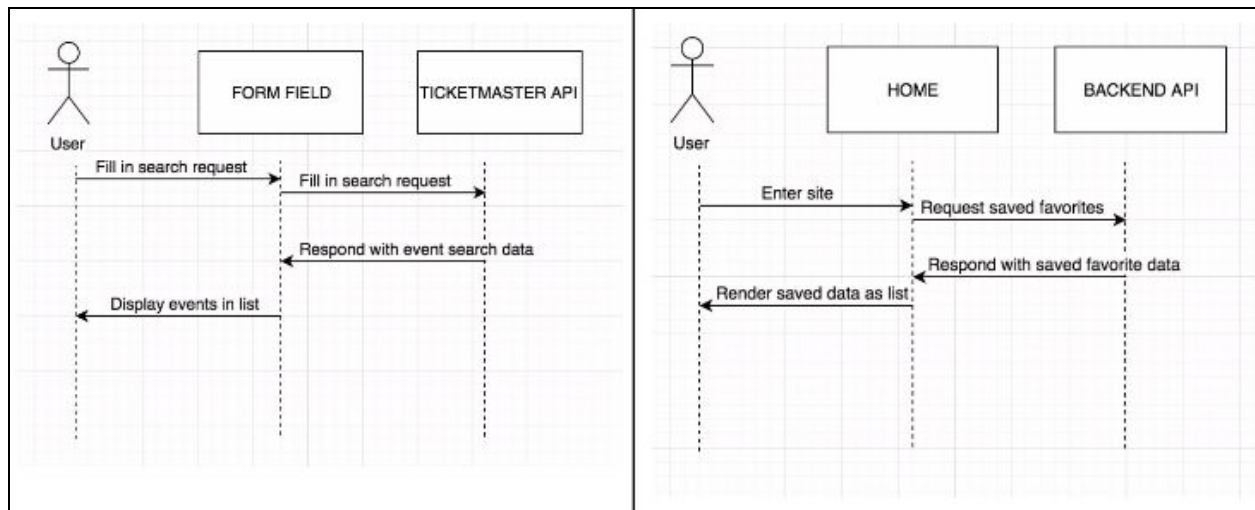

P 5 Sitemap
